Respiratory Care Pharmacology presents the essential, need-to-know information on respiratory pharmacology. It covers pharmacokinetics principles as they relate to respiratory agents, drug administration, and a range of specific drugs used in respiratory care and their effects on body systems. This new 6th edition features newly released drugs and updated discussions with new content on adrenergic bronchodilators, mucoactive agents, antiasthma agents, anti-infective agents, cardiac drugs, and circulatory drugs. This edition also includes more clinical scenarios and a new two-color design throughout.
